

# SUSTAINABLE WAVE DEFENCE – PROTECTING OUR FUTURE

**RESILIENCE TO CLIMATE CHANGE** Provides safety against storms up to 125% more severe

**ECONOMICAL** Reduced material quantities

**LOW CARBON FOOTPRINT** Relative to other hard structures [concrete and rock]

**VERSATILE** Applicable at roundheads and on a rocky seabed

**LONG TRACK RECORD** Applied more than 15 years, over 500,000 blocks placed

# SUSTAINABLE WAVE DEFENCE - PROTECTING OUR FUTURE

**MAXIMUM RESILIENCE TO CLIMATE CHANGE** Safety against more severe storms

**MOST ECONOMICAL** Reduced material quantities & 30% - 50% fewer blocks

**MOST ECOLOGICAL** Increased biodiversity within structure

**MINIMUM CARBON FOOTPRINT** Relative to other hard structures [concrete and rock]

**AESTHETICS** Smooth, architectural finish - Ideal for marinas and shore protections in urban environments
